Ordering Icon Material

What's Available

Icon is available on diskettes for personal computers and UNIX. There also is a program library that contains a large collection of Icon programs and procedures.

Program material includes documentation about installing and running Icon. This documentation does not, however, describe the Icon programming language. A book is available separately.

The UNIX implementation of Icon supports its graphics facilities. Personal computer implementations of Icon do not.

The UNIX package contains source code but not executable files. Icon can be configured for many UNIX platforms. Executable files and source code are packaged separately for personal computers.

Updates to the Icon program library and the source code for Icon are available by subscription. Both library and source-code subscriptions provide four updates and both are issued two or three times a year.

Documentation

There are two books on Icon. One contains a complete description of the language, and the other describes its implementation.

There also are two newsletters. The *Icon Analyst* contains material of a technical nature, including in-depth articles on programming. There is a subscription charge for the *Analyst*. The *Icon Newsletter* contains information of topical interest and is available on the Web. There is a one-time fee for an ongoing mail subscription. The *Newsletter* is included, however, with subscriptions to library and source-code updates and the *Analyst*. Sample copies of the newsletters are available on request.

Payment and Prices

Payment must accompany orders and be made by check, money order, Visa, or MasterCard. The minimum credit card order is $15. Remittance must be in U.S. dollars, payable to The University of Arizona. Checks must be drawn on a bank with a branch in the United States.

Organizations that are unable to prepay orders may send purchase orders, subject to approval, but there is a $5 charge for processing such orders.

The prices quoted are good until May 31, 1996. After that, prices are subject to change without notice.

Diskettes

Diskettes are written in MS-DOS format except for the Macintosh. The following symbols are used to identify different types of diskettes:

⎏ 3.5" HD   ⊟ 3.5" LD

Shipping Charges

The prices listed include handling and shipping by parcel post in the United States, Canada, and Mexico. Shipping by other means is available at cost.

Shipment to other countries is made by air mail only, for which there are additional charges as noted in brackets. For example, the notation $15 [$5] means the item costs $15 and there is a $5 shipping charge outside the United States, Canada, and Mexico.

Supporting the Icon Project

You can help support the Icon Project by including a contribution with your order. A line for this is provided at the bottom of the order form.

Price List				
Executables				
MS-DOS	⊟	DE	$15	[$5]
MS-DOS 386 and higher	⊟	DE-386	$15	[$5]
Macintosh/MPW	⊟	ME	$15	[$5]
