

CONTENTS

CHAPTER I

MATERIALS

	PAGE.
Methods of Diversifying a Woven Fabric—Textile Materials and their Effects in the Woven Fabrics—Materials used in Woollen and Worsted Manufactures—Wool—Properties of Wools—Properties of Wools for Saxony Cloths—Properties of Wools for Cheviots—Properties of Wools for Worsteds and Comparison of Wools for “Woollens” and “Worsteds”—Wools of Different Countries—Mohair, Alpaca, and Cashmere—Wool Substitutes—Noils—Mungo and Shoddy—Difference between Wool and Mungo—Mungo Production—Extract Wool—Flocks—Cotton—Silk	1

CHAPTER II

WOOLLEN YARN MANUFACTURE: WOOL SORTING, SCOURING AND BLENDING

Sorting—Wool-Washing—Detergents used in Scouring—Wool Dusting Machine—Wool-Steeping—Hand Method of Scouring—Scouring by Volatile Solvents—Scouring Machines—Utilization of Waste Scour Solution—Drying—Teazing—Burr-Extraction—Chemical Burr-Extraction—Oiling—Blending—Preparing the Blend—Fearnought—Pulled Waste Machinery	43
---	----

CHAPTER III

WOOLLEN YARN CONSTRUCTION: CARDING, CONDENSING, SPINNING AND TWISTING

Nature and Objects of the Process of Carding—Composition of Sets of Carding Machinery—Functions of the different Parts of a Carding Machine—Passage of the Material through the Machine—Carder for Producing a Woollen Thread with Worsted Characteristics—Speeds of the Cylinders—Relation of the Teeth of the Card Clothing on the different Rollers to each other—Card Clothing—Sets of Card Clothing—Setting or	
---	--

	PAGE
Proximity of the Rollers to each other—Automatic Feeds— Preparatory Motions for the Scribbler and Carder—Modes of conveying the Scribbled Wool from one Machine to another —Component Parts of Machines and Carding Surface— Examples and Applications of various sets of Machines— Methods of Driving Carding Machines—Condensing—Types of Condensers—Spinning—Compound Nature of Spinning —Winding the Yarn on the Spindles—Method of Driving —Continuous Spinning of Woollen Yarn—Comparison be- tween Mule and Frame Spun Yarns—The Twisting Frame —PRODUCTIVE POWER OF MACHINERY USED IN WOOLLEN YARN MANUFACTURE	94

CHAPTER IV

WORSTED YARN CONSTRUCTION

The Term “Worsted” —Systems of Worsted Yarn Manufac- ture—Preliminary Processes: Blending—Worsted Carder, Burring Appliances—Worsted Carder, Methods of Driving —Particulars of Card Clothing for Cross-bred and Botany Worsted Carders—Backwashing—Gilling—Combing— Noil Production—Nip and Square Motion Combs—Conti- nental Worsted Comb—Main Features of Rectilinear Comb— Principles of Action—Action of the Rollers, Nippers, Upper and Lower Swords—Noiling and Burring—Carded and Combed Wools—Processes of Drawing: English System— Drawing Machines—Roving—Worsted Spinning—Con- tinental System—French or Continental Drawing—Method of Treatment for a Blend of Wool and Cotton (Worsted Yarn) —Continental Worsted Yarn: without Combing—Costing of Worsted Yarns—PRODUCTIVE POWER OF MACHINERY USED IN WORSTED YARN MANUFACTURE	181
