### MAYSVILLE WARP

4-Ply

Highest Quality

MAYSVILLE Warp has been used continuously by the best weavers for over 50 years. What better proof could there be of its uniform high quality? Unequaled for strength, brilliancy and evenness of color, full yardage, freedom from knots, weak spots and imperfections found in ordinary warps which cause annoyance and loss of valuable time.

Weavers should buy warp from a reliable source of supply where they are assured of prompt service and lowest wholesale prices. Our warp business is enormous; we order tons at a time, and since we always have large stocks on hand, can generally fill your orders, no matter how large, within 24 hours' time. We buy warp at manufacturer's prices and sell to users of our looms at about cost, so that you actually pay us less per pound than your nearest wholesaler must pay for the warp he buys; thus you save both the wholesaler's and the retailer's profits.

MAYSVILLE Warp is wound on half-pound tubes, each containing 800 yards. A pound of warp will thread the loom with 3 yards of warp (figuring 12 threads to the inch, and a yard wide). In weaving, this will shrink to 9/10 of its length, that is, 10 yards of warp on the loom will give you 9 yards of finished goods. When ordering warp, be guided by your Instruction Book, which tells you to order as many half-pound tubes as are needed to fill your spool rack.
