Geost, located on Thornydale and Orange Groove Rd in Tucson, is looking to hire a part-time worker to help develop a project website. Geost is involved in a worldwide project called Space View, which is a movement to collect data about satellites and other objects in orbit

Qualifications are as follows:
Experience with bash shell scripts and linux operating systems; Python and javascript, familiarity using django, angularjs, nodejs, grunt, yeoman, and/or any other type of tools for webpage construction. For more information check their website at http://www.spaceviewnetwork.com/ for more information on that. It's a great place to work with a friendly staff and a comforting environment to grow. Interested students should forward their resumé to charles.conrad@geost.com
