**A Jones PC Services LLC Company**

Octavia Technology is a startup Web & Software Development company based in Arizona. We work with small business and startups getting their companies off the ground by assisting them with their online needs. This includes website development, reputation management and other online services as needed. Octavia Technology is currently looking for **4 developers** (2 software and 2 web developers) who would like to be part of our non-pay internship for the Spring 2016 semester.

**This individual needs to be:**

- A motivated self-starter
- Highly Organized
- Creative
- Confident
- Good academic standing
- Good standing with their financial aid (if applicable)
- Able to research questions and ask for help
- Able to work up to 10 hours a week (could be more)

**The Responsibilities include:**

- Provide support and assistance in developing website or web-app using HTML5/CSS3 and Javascript
- Provide support and assistance in other development projects as needed

**Qualifications**

- Is currently a computer science or information science major
- Has taken a web development course through the University of Arizona CS337 or ISTA230
- Has a good working knowledge of HTML5 & CSS3 (Javacsript and PHP is a plus, but not required)
- Can work well in a team environment
- Have taken CS 335 (*software developers only*)
- Knowledge of any of the following programming languages (*software developers only*):
    o Python
    o Java
    o C++
- Knowledge of using Google to search for answers when needed

**Required Experience**

- None

To apply, please contact email Andrae at andrae@octavia.tech and he will send you an application. All applications due by December 15th, 2015. Interviews will be held before finals.
