Are you a computer science major? We are seeking an individual that specializes in web development technology. The candidate must have a solid understanding of WordPress CMS. Ability to work at a very high level of technical complexity; mental discipline in resolving software problems, and ability to change priorities as projects expand or project needs change.

Preferred Skill Set:

- Advanced knowledge in HTML, CSS, and Javascript required.
- Proficient with Photoshop
- Solid understanding of how browsers work with website functionality
- WordPress & WooCommerce
- Ability To Solve Slow Webpage Load Times
