Title: Applications Technologist I - Raytheon

Job Description:
Foundation Application Services (FAS) within Global Business Services (GBS) IT has an immediate opening for a User Experience (UX) Front End Engineer to support various functional areas of SAP.

This individual will be responsible for staying up to date on web technologies/techniques, building solid front-end architectures that integrate easily with other systems and technologies, understanding design patterns and write reusable, modular code, working closely with other disciplines (UX, Design, Engineering, QA), and having a solid understanding of cross-browser/platform issues and code solutions.

Required Skills:

- Experience with JavaScript
- Familiarity with developing in HTML5 and CSS3
- An understanding of software development and test methodologies and processes
- Ability to team with business analysts to understand user requirements and needs
- Exceptional communication skills, both written and verbal
- Proficiency in Microsoft Office, including familiarity with MS Visio

Desired Skills:

- Familiarity with SAP software
- Experience with building web applications in a professional work environment (outside of class)
- Demonstrated success building trust and strong relationships with partners and customers

Required Education (including Major):
B.S./B.A. in Computer Science or MIS.
