```
accept E(formals) do
  statement list;
end;

select when B₁ => accept statement; additional statements;
or ...
or      when Bₙ => accept statement; additional statements;
end select;

select  entry call; additional statements;
else    statements;
end select;

select  entry call; additional statements;
or      delay statement; additional statements;
end select;
```

Ada accept and select statements.
